SPECIAL THANKS

Dear Faculty, Staff, Students, Families, and Partners,

It has been five amazing years since we began our journey together in transforming our great historical school, The English High School. I am transitioning back to the Boston Public Schools' central office to continue the work of redesigning high schools but I will forever be honored to have served as your headmaster. I am thankful for those who believed that it was possible to revamp The English as the school where college and career offerings are integrated to help students' do college-level critical thinking and gain skills and credentials to be successful in any industry employment.

The English High School is proof that if we work together as a team in changing school cultures, then we can really reshape the school experience and have a positive impact in transforming students' lives. Our work has been showcased in multiple states around the country and I hope that the State recognizes that The English of today is a great place where students can learn and teachers can teach at high levels.

You the students, staff, parents, Alumni Association members, and partners have been incredibly supportive in the reorganization of the school -- integrating college and career programming to meet the global demands of tomorrow's workforce, creating consistency in instructional practices, putting efficient systems in place, holding high expectations for our students and for ourselves, increasing students' academic accomplishments, and revamping the school culture into a positive, safe educational and work environment. I can honestly say – we did it!

The English of today modernizes the 1821 vision of preparing students for careers of the future. We have created five Career Vocational Technical Educational pathways approved by the State within a year and a half. We became the pioneers of the first Spanish Debate League, our robotics team is rocking the robotics competitions, and our summer school is unique to BPS. And, last summer we received the School of the Year Award by Diplomas Now as well as the Headmaster of the Year.

We are a hub of best practices in how we collect data and use in-house benchmarks for students, faculty, and partners. Our teachers' lead Early Warning Indicators system to support student achievement and our very own former ELA special education teacher is not only building capacity at our school, but around the nation. Our schools Educator Facilitator who lead our Professional Development sessions– these are truly Blue on Blue teacher leaders! Our English as a Second Language department's curriculum and instructional practices were showcased by the Massachusetts Department of Elementary and Secondary Education for outstanding practices.

Our students with disabilities enjoy the rigorous programs we created to ensure a positive transition by building their life skills. We are so proud of them and their accomplishments when they learn how to swim, demonstrate job readiness skills, and become more independent. I thank our student support team for the programs they have created to assist our students and their families in improving their lives.

To our partners – I have to say "THANK YOU" for believing in us, investing in our students, and for aligning your work to our goals and targets. In less than a year, we created a coherent system for working with all our internal and external partners. A special shout out goes to City Year – your support has been a key to our student success. Go Red Jackets!

I love our school and the people who have worked and still work in this great institution. I enjoy working with students and interacting with parents every day. I believe in the Boston Public Schools' mission and vision and it is time to go back to central office to work on the redesign of high schools. I know that I am part of the history of The English not only because I am the first female headmaster, but also because I met great students and people who inspired me every day and whom I wish the very best in this journey called life.

I am not saying good-bye but until we meet again.

Sincerely,

"Ms. Noriega"
Ligia B. Noriega-Murphy
